SCHOOL REPORT.

The schools of the town have been generally favored the past year with competent and faithful instructors, and their legitimate work has gone quietly forward, showing good, and, in some cases, excellent results.

Examinations have been listened to with pleased attention, by goodly numbers of parents and friends, and it is believed that the work done will compare favorably with that of previous years.

After a careful examination of several works on Physiology, Brand's "Lessons on the Human Body" was selected for use in our common schools, and has been introduced into all of them, and instruction given in accordance with the laws of the State.

Several of the school houses in the town are much in need of repairs, which should be made before they are used, to protect pupils from the rains of summer, as well as the snows of winter. An appropriation for the purpose should be made at the school meeting.

Respectfully submitted.

ISAAC H. JONES.

DISTRICT No. 2.

This school has been taught during this, as in the past year, by Miss Emily H. Priestley, of Saxonville, Mass. The observation of her school from time to time, by the different members of the Board, enables them to testify to the general quiet and orderly deportment of her scholars, and also the manifest interest and improvement in their studies. The visitors could not see good reason why any scholar well disposed, and anxious to do his best, might not have derived the same degree of benefit which so many others secured.

The statistics of the school for the year may be found in the report of the Town Superintendent.
